## DRIVE SYSTEMS

motion solutions for  
leisure, mobility and  
industrial applications

**PARVALUX®**

[www.parvalux.com](http://www.parvalux.com)

**STAIR LIFT**  
unique worm-spur double reduction gearbox  
delivering 124Nm of torque in compact design

**WHEELCHAIR POWER ASSIST**  
sealed worm gearbox with  
de-clutch and brake options

**POWERED GOLF CADDY**  
lightweight worm plastic gearbox  
with hollow shaft option

**MOBILITY SCOOTER / GOLF RIDE-ON**  
robust gearbox with black powder-coated  
finish, brake and special shaft

**POWERED GOLF CADDY**  
lightweight plastic gearbox with differential  
gearing for improved manoeuvrability

**DOOR OPENER**  
PM44-50 fitted with spade connectors  
and compact worm gearbox

**CARAVAN MOVER**  
bespoke worm unit with ergonomic chassis and  
integrated housing for easy installation

**FLOOR CLEANER**  
rare-earth motor fitted with long-life  
sealed worm gearbox and brake

**MOBILITY AID**  
worm gearbox with 3-point fixing  
for wheelchair vehicle access winch

## permanent magnet DC motor

standard motor configured and customised for your application

MOTOR	Permanent magnet DC
SPEED	1500 - 8000 rpm
PROTECTION	IP44 - IP66
POWER	up to 180 Watts
VOLTAGE	12 - 240V DC
INSULATION	Class F
CONSTRUCTION	Ferrite magnets; aluminium end castings; single piece steel body; replaceable carbon brushes; 300mm flying leads; maximum shaft diameter 8mm
EXTRAS	Ventilated motor with internal fan (IP2x); encoder to RoHS standard; 12V or 24V 2Nm failsafe holding brake; dedicated cable harness; spade connectors

	PM44-25				PM44-38				PM44-50		
	Power (W)	Speed (rpm)	Torque (Nm)		Power (W)	Speed (rpm)	Torque (Nm)		Power (W)	Speed (rpm)	Torque (Nm)
Continuous S1 duty (assuming 24V supply)	30	5000	0.057		50	5000	0.095		-	-	-
	30	4000	0.070		50	4000	0.120		65	4000	0.155

	45	2000	0.215		75	2000	0.359		100	2000	0.478

Notes: Designed to operate with PWM controllers.

Graphs are available showing the motor performance throughout the speed range.

This motor may be coupled with many of our standard worm, spur and planetary gearboxes.

For customers who require in excess of 5000 units per year we offer a totally bespoke design service to fit the application; at zero cost premium. This service enables customers to outline any number of mechanical, electrical, environmental or even aesthetic requirements in order to realise their preferred motor-gearbox solution.

To find out more please contact a member of our sales team on +44 (0)1202 512 575 or visit our website at [www.parvalux.com](http://www.parvalux.com) for further information.

	97	20	34.7*	33.9*	89	20	45.8*	45.0*	178	21	-	-	75	74%	40	45

Notes: Designed to operate with PWM controllers.

Graphs are available showing the motor performance throughout the speed range.

The GB4 gearbox is available as an MRO product; for new applications we recommend the GB12 gearbox instead, which offers improved performance with similar dimensions.

For customers who require in excess of 5000 units per year we offer a totally bespoke design service to fit the application; at zero cost premium. This service enables customers to outline any number of mechanical, electrical, environmental or even aesthetic requirements in order to realise their preferred motor-gearbox solution.

To find out more please contact a member of our sales team on +44 (0)1202 512 575 or visit our website at [www.parvalux.com](http://www.parvalux.com) for further information.

\*Gearbox life may be less than 5000 hours. Contact us for application advice. † Maximum theoretical efficiency.

Notes: Designed to operate with PWM controllers.

Graphs are available showing the motor performance throughout the speed range.

The GB4 gearbox is available as an MRO product; for new applications we recommend the GB12 gearbox instead, which offers improved performance with similar dimensions.

For customers who require in excess of 5000 units per year we offer a totally bespoke design service to fit the application; at zero cost premium. This service enables customers to outline any number of mechanical, electrical, environmental or even aesthetic requirements in order to realise their preferred motor-gearbox solution.

To find out more please contact a member of our sales team on +44 (0)1202 512 575 or visit our website at [www.parvalux.com](http://www.parvalux.com) for further information.

\*Gearbox life may be less than 5000 hours. Contact us for application advice. † Maximum theoretical efficiency.

## PM90-150 / PM90-180 / RE90-146 (rare earth) with GB4 gearbox

standard motor configured and customised for your application

Motor Type	Motor Weight	Gearbox Weight with Delrin	Gearbox Weight with bronze	DIM A	
				Totally Enclosed	Ventilated
PM90-150	3.0 kg	1.0kg	1.4 kg	264	277
PM90-180	4.0 kg	1.0kg	1.4 kg	294	307
RE90-146	4.0 kg	1.0kg	1.4 kg	260	273

EXIT A AS SHOWN  
EXIT B IS THE OPPOSITE HAND

All dimensions are in mm  
Many of our drawings are available in  
3D format. Please contact us with your  
requirements

# PM90-150 / PM90-180 / RE90-146 (rare earth) with GB9 gearbox

standard motor-gearbox configured and customised for your application

MOTOR	Permanent magnet DC	GEARBOX	Worm and wheel
SPEED	1500 - 8000 rpm	RATIOS	12.5:1, 25:1, 30:1, 60:1, 75:1
PROTECTION	IP44 - IP66	EFFICIENCY	up to 95%
POWER	up to 900 Watts	MATERIALS	Delrin or phosphor bronze
VOLTAGE	12 - 240V DC	SHAFT	single or double up to 25mm diameter
INSULATION	Class F	CONSTRUCTION	Steel worm shaft; CNC machined aluminium housing; sealed for life - maintenance free; cushioned 1-piece coupling; steel output shaft with 2 ball-bearings
CONSTRUCTION	Ferrite or rare-earth Neodymium (NdFeB) magnets; aluminium end castings; single piece steel body; replaceable carbon brushes; 300mm flying leads	OPTIONS	Stainless steel shaft; black finish; dog clutch
EXTRAS	Ventilated motor with internal fan (IP2x); encoder to RoHS standard; 12V or 24V 2Nm failsafe holding brake; dedicated cable harness

\*Gearbox life may be less than 5000 hours. Contact us for application advice. † Maximum theoretical efficiency.

Notes: Designed to operate with PWM controllers.

Graphs are available showing the motor performance throughout the speed range.

The GB9 gearbox may be coupled with many of our other standard AC or DC motors.

For customers who require in excess of 5000 units per year we offer a totally bespoke design service to fit the application; at zero cost premium. This service enables customers to outline any number of mechanical, electrical, environmental or even aesthetic requirements in order to realise their preferred motor-gearbox solution.

To find out more please contact a member of our sales team on +44 (0)1202 512 575 or visit our website at [www.parvalux.com](http://www.parvalux.com) for further information.
